Graduate school of Engineering, Division Electric, Electronics, and Infocommunications Engineering

## Integrated Information Design Area, HIROSE Lab.

(http://ssc.eei.eng.osaka-u.ac.jp)

Prof.: Tetsuya Hirose, Assoc. Prof.: Daisuke Kanemoto

To achieve high performance LSI systems that will be fundamental key devices for next generation IoT/AI society, we develop an ultra-low voltage and ultra-low power LSI, energy harvesting systems, and biomedical sensing systems.

**Development of Integrated functional** systems スマートデータに! 精度改善/学習 Al / Data-center AI/データセンター 現実社会を 現実社会に Cloud / Big data ビッグデータに フィードバック!! IoTアプリケーション R&D of IoT edge devices

LSI systems operating with subtle environmental energy (Harvesters: small PV cell, TEG, etc.)

**Power management LSIs**
